DESCRIPTION

Block Out is a water-soluble product used to stop the fluorescence of urine deposits in carpet. It is used as the final step in urine decontamination procedures when re-contamination is anticipated and prior contamination needs to be masked or hidden. Block Out can be removed when desired by thorough hot water extraction cleaning of the area treated.

USAGE

Block Out is ready to use and requires no dilution.

Using a UV light to identify the urine deposits, apply Block Out to the fluorescent fibers. Apply product in sufficient quantity to mask the fluorescence but not so much as to cause a dark spot. Your goal is to have the urine deposit disappear when viewed under the UV light.

CAUTIONS:

Do Not Ingest.
Do not get into eyes.

If ingested call a doctor.

For eye contact flush eyes for 15 minutes with clear water and if irritation persists consult a doctor.
